

Business Intelligence with Tableau Fast Start

Business challenge

Today's businesses run on data. The ability to discover, share and integrate data intelligence determines which companies thrive — and which will be left behind. But enabling data intelligence requires a deep understanding of both technical platforms and business enablement, and the experience to set a roadmap aligned with repeatable business wins.

How we help

Insight can help you unlock the value of your data using the power of Tableau. Our award-winning team of designers, engineers, architects and data scientists will help you develop compelling visualizations and intelligence implementations that integrate with your current data estate and demonstrate modern capabilities. We can explore:

- Powerful, interactive visualizations
- Role-based access control and segmentation
- Data manipulation and management with Tableau Prep
- Real-time data integration

Preparing for transformation

To ensure you receive the greatest value from this engagement, you'll need:

- Business and technical stakeholders hungry to gain more value from your data
- Possible scenarios that could benefit from exploration and implementation
- A Tableau Server license or Tableau Online tenant

Duration

2–4 weeks

Benefits

- Identify value cases for your organization.
- Demonstrate rapid prototyping using your data.
- Deploy one or more demos.
- Socialize value in readout sessions.
- Build roadmap of implementation.

Get started.

Our approach

Ideation & envisioning	Rapid PoC	Visualization & readout
We'll begin by exploring the power of Tableau and align its capabilities with your business opportunities. Together, we'll shape one to three cases for Proof of Concept (PoC) implementation.	Next, we'll roll up our sleeves and iteratively deliver on the cases envisioned on the first day of our engagement — and consistently refine our delivery and direction with your business, IT and leadership stakeholders. At the end, you'll receive code and artifacts, as well as one to three demo-ready Tableau solutions deployed.	On the final day, we'll drive executive and technical readouts to facilitate PoC understanding and knowledge transfer covering demos, implementation, value assessments and future opportunities. You'll be equipped to demonstrate value to your business, IT and leadership stakeholders and identify next steps for your Tableau journey.

About Insight

At Insight, we define, architect, implement and manage Insight Intelligent Technology Solutions™ that help your organization run smarter. We'll work with you to maximize your technology investments, empower your workforce to work smarter, optimize your business and create meaningful experiences.
