Dashboard in a Day Workshop

About this workshop

Insight and Microsoft understand that staying ahead of the curve in today's economic climate means leveraging as much data as possible to make critical business decisions more effectively. But transforming raw data into actionable insights requires a powerful tool set — and the technical knowledge to put it to use.

Insight's one-day Business Intelligence Workshop provides the on-site training and support to help your organization discover, integrate and visualize data intelligence using Power BI®. Spend a day learning from our experts and getting hands-on experience with reporting and dashboarding tools. Participants will leave with a working knowledge of how to create, share and publish reports for a range of business use cases.

Who should attend

Data engineers, report writers, business analysts, business decision-makers and others looking to accelerate reporting success will gain valuable experience with Power BI. Little to no previous experience is required.

Workshop topics

This workshop will expand knowledge of data intelligence and Power BI by teaching you how to:

- Connect to, import and transform data from a variety of sources.
- Define business rules and Key Performance Indicators (KPIs).
- Explore your data with powerful visualization tools.
- Build stunning reports.
- Share your dashboards with your team and/or the world.

Duration
1 day

What to expect
- Overview of Power BI® tool capabilities
- Exploration of Power BI tool best practices
- Demonstration of Power BI tool use
- Hands-on labs with the Power BI tool
- Opportunity to experiment with your own data

Key takeaways
- Get hands-on experience gathering data.
- Gain real-time understandings of your business and your customers.
- Rapidly unlock insights by mashing up multiple data sets.
- Create powerful visualizations and publish using strong security.
