- Hospitality
- Warehouse
- Field Services
- Healthcare
- Logistics

Fast Facts

- Enterprise IT leaders plan to spend **8%** of their hardware budgets on tablets and mobile devices in addition to the funds already allocated for laptops, desktops and accessories
- **62%** of U.S.-based workers agree mobile phones or tablets play a key role in helping them be productive at work
- **33%** of employees working from home are using personal devices that have no security controls on them to connect to their business network

Features & Benefits of ThinkPhone

Trusted Security and Easy Manageability

Your business data and mobile platforms are secured by *ThinkShield®* for mobile. AI-based defense systems, government-grade certifications, trusted suppliers, vetted manufacturing processes, and a dedicated incident-response team deliver 360° protection.

Deploy **Lenovo ThinkPhone by Motorola** right out of the box with zero-touch enrollment. Manage your entire fleet from a single location and create a customized experience for your organization.

Kept in Confidence

Device hardware, firmware, and software are integrated to protect your most sensitive data from mobile threats. With Moto KeySafe®, PINs, passwords, and cryptographic keys are isolated from other device data for an added layer of high-level security.

Built for where your business takes you

Take whatever work throws at you with impact-resistant Gorilla® Glass Victus™ display protection. MIL STD 810H-tested¹ for durability, **ThinkPhone** is crafted from aramid fiber that is stronger and lighter than steel, with an aircraft-grade aluminum frame. **Lenovo ThinkPhone** is also IP68-certified² to withstand dust, dirt, sand, and submersion in shallow water.

Why Motorola

- **Affordability:** offer a great value for their price, making them a cost-effective option for businesses looking to outfit their employees with reliable and functional devices.
- **Durability:** strong and sturdy designs that can withstand daily wear and tear.
- **Long Battery Life:** designed with long battery life.
- **Security:** fingerprint sensors, facial recognition, and encrypted storage. These features can help protect sensitive business data and prevent unauthorized access.
- **Customizable:** ability to add custom logos or colors to devices. This can help companies reinforce their brand identity and create a more professional image.
