

On-the-Go, Real-World Business Computing

Innovation at the speed of business is a Lenovo ThinkPad® and Intel® specialty.

Sleek, innovative Lenovo devices—like the ThinkPad X1 Carbon powered by Intel vPro®, an Evo™ design with 13th Gen Intel® Core™ processors—accelerate real world computing. With superior performance and professional-grade features for the ultimate business experience on the go, users can count on fewer distractions, better security, and all-day battery life. And work in the new Unison™ seamlessly between PC and your smartphone of choice.

An Evo Design

Designed for multi-tasking, mobile pros

Lenovo and the Intel vPro® platform, empower organizations to get more done, faster—no matter where or how your teams work. The hybrid architecture of the 13th Gen Intel Core processors powers the tasks that matter most, keeping revolutionary performance and unparalleled responsiveness always within reach.

Video collaboration that keeps you focused

Video conferences are an everyday necessity in the real world. Intelligent collaboration features accelerated by Intel® GNA and Intel® Iris Xe graphics tools power effortless AI-enabled calls that adapt to callers' surroundings to create superior experiences from any location.

Work anywhere in Unison™

Whether Android or iOS, Intel® Unison™ seamlessly connects an Intel Evo™-certified ThinkPad to your smartphone of choice for a universal content sharing experience. Help teams save time and reduce frustration by effortlessly managing everything on one screen.*

File Transfer allows users to take a video on their phone and edit it on their Lenovo PC.

Calls and Messages can be sent or received directly from a Lenovo PC.

Notifications can be received and managed through a Lenovo PC.

Automatic background distraction removal with neural networking

Automatic lighting adjustment

Face-framing technology keeps users visible even when they're moving around

Background noise disappears with audio neural noise cancellation

Everything IT needs and users want

The Intel Evo platform delivers everything IT teams need to manage mobile pros anywhere and everywhere. Boost productivity with the Intel vPro® platform, designed to help you manage a fleet of Lenovo PCs easier than ever.

* Intel® Unison™ solution is currently only available on eligible Intel® Evo™ designs on Windows-based PCs powered by 12th Gen Intel Core or newer CPU and only pairs with Android- or iOS-based phones; all devices must run a supported OS version. See intel.com/performance-evo for details, including set-up requirements. Results may vary.

Windows 11

Empower Collaboration

Intel-powered Lenovo devices bring enterprise-class performance, security, stability, and manageability to work-from-anywhere teams of all sizes. These systems are uniquely built for what IT pros and users need to thrive today.

Deploy optimal hardware for Windows 11 and guarantee reliable upgrades with the combined power of Lenovo and the proven Intel vPro® platform.

Boost performance and reliability with business WiFi's biggest advancement in 20 years—WiFi 6E—designed to bust through congestion and interference so workers can tackle their day.

Optimize workloads with enhanced hybrid core architecture, featuring a new Performance core (P-core) design to ensure maximum performance.

Power energy efficiency with the unique ThinkPad keyboard airflow and rear venting design, paired with Intel® Dynamic Tuning Technology to enhance battery life and user experience.

Work smarter, not harder.

Help your team win with the combined power of Lenovo, the Intel vPro® platform, and Windows 11. Give them a head start with a complete, integrated solution designed to make working on the go faster and smarter.
